

Pallet Less Bulk Bag from Intertape

A superior method of shipping, this Pallet-Free™ FIBC features reusable polymer bottom channels, eliminating the need for a pallet... and its cost. When filled, it creates a square shape that's easy to maneuver and stack, doubling your product storage capacity. Flexible in its design, the Pallet-Free™ FIBC can be constructed in a variety of sizes and styles. Versatile, it can be lifted from the top loops or the bottom channels. Available in Intertape brand Circular and Baffle FIBCs, with custom configurations that are endless.

The Intertape® brand Pallet-Free™ FIBC is manufactured using woven polypropylene fabric in a 4-sided construction with internal baffles. This 1000 kg (about 2,205 pounds) bulk bag measures 42" x 42" x 42" unfilled and utilizes standard fill and discharge spouts and lift loops. Also available in a seamless design. The bottom of the FIBC has been engineered to include two unique pockets that house the rigid fork-lift channels eliminating the need for a pallet. Simply stated, the Pallet-Free™ FIBC has its own built-in pallet.
